

A technical drawing of a rectangular frame, likely for a display or artwork. The frame consists of a large central rectangular area surrounded by a border. The border is composed of several segments, with the top and bottom segments featuring a series of small, rectangular protrusions or tabs. Two circular mounting holes are located on the top edge of the frame, one on the left and one on the right. The drawing is a line art representation, showing the frame's structure and mounting points.

The floor plan of the 1st floor shows a long central corridor (100) with rooms 101 through 106 on the left and 107 through 112 on the right. Rooms 101-106 are large lecture halls, each containing several rows of desks. Rooms 107-112 are smaller lecture halls or meeting rooms. A central staircase (100) is located at the top of the plan. The plan also shows various entrances, exits, and service areas.
